Education

Thapar Institute of Engineering and Technology <i>Bachelor of Engineering in Computer Science and Business System (CGPA: 7.02 / 10.00)</i>	August 2023 - May 2027 Patiala, Punjab
School of Eminence, PheelKhana <i>High School Diploma in Science - Mathematics Physics Chemistry (Percentage: 92.33 / 100.00)</i>	April 2022 - March 2023 Patiala, Punjab

Experience

Ministry of Statistics <i>Research Fellowship</i> - Researched and developed an approach for estimating the monthly per-capita expenditure of households, including feature selection, by using Explainable-AI. - Engineered features for accurate estimation while accounting 87 features over 120+ features from all the levels of survey data.	August 2025 – Present
Thapar Institute of Engineering and Technology <i>Research Assistant</i> - Designed and optimized integrated CNN architectures for real-world image classification, surpassing current accuracies and publishing 99.04 percent accuracy. - Currently pursuing research and designing of algorithm for Neurological Diseases utilizing EEG signals as data sources.	January 2025 – Present

Projects

VidyAI Python, LLM, RAG, Vector Databases, Finetuning Methods, Agent Workflow, FastAPI, React.js - Built an AI-powered academic assistant using LLMs and RAG architecture to help students navigate curriculum data, external references, and university library resources through a single intelligent interface. - Delivers on-demand content summarization, contextual query answering, and auto-generated quizzes – reducing study friction and enabling personalized learning from multi-source knowledge bases.
GovIntel.AI Python, LLM(Illama), MongoDB, Deep-Translator, Streamlit - Developed a Streamlit-based multi-label classifier for National Industrial Classification (NIC) codes, powered by LLMs, to modernize how government officials and businesses handle new-age industry categorization. - Significantly reduced manual lookup time for NIC code identification, making industrial classification faster, more accurate, and accessible to non-technical stakeholders.
VidhiLM Python, Google Cloud Platform - Engineered an AI-powered legal assistant on GCP to tackle query resolution, case classification, and actionable legal insight generation across IPC, CrPC, and Constitutional domains. - Enabled quick, accurate legal guidance for individuals and businesses – democratizing access to complex legal frameworks without the need for specialist consultation for every query.

Technical Skills

Core AI/ML: Python, Scikit-learn, PyTorch, Hugging Face, Machine Learning Algorithms (XGBoost, Decision trees, Random Forest, etc.), Neural Networks, LLMs, RAG, Vector Databases, Explainable AI
Cloud & Deployment : Google Cloud Platform, Flask, Streamlit
Data & Databases : MongoDB, MySQL
Frontend : HTML, CSS, JavaScript, React.js

Extra Curricular – Achievements / Awards

- **First Runner Up** in HackSecure X International Hackathon 2026, organized by the **University of South Florida** – 2026
- **Bagged 4th Position** at IIT Gandhinagar Hack The Future 2025, organized by the **Ministry of Statistics** – 2025
- **Served as Control Engineer** at the Mechatronics and Robotics Society (2024-2026)
- **Served as Overall Student Coordinator** at the Center of Excellence - Data Science and AI (2025-2026)
